CAREER OBJECTIVE

Motivated Computer Science undergraduate with a strong foundation in machine learning, full-stack development, and AI-driven systems, seeking opportunities to apply technical expertise in building scalable, data-driven solutions. Passionate about innovation, continuous learning, and contributing to impactful real-world projects in software engineering and artificial intelligence.

EDUCATION

VIT Bhopal University

B.Tech Computer Science and Engineering

Sep 2023 - Present

CGPA: 8.33

Modern Delhi Public School, Faridabad

Class 12th

2023

73%

Modern Delhi Public School, Faridabad

Class 10th

2021

93%

PROJECTS

HCSAM- UnetMamba++

PyTorch, Torchvision, NumPy, OpenCV, Pandas, Matplotlib, Scikit-learn

UnetMamba++ is a hybrid U-Net and state-space based semantic segmentation model for high-resolution remote sensing images. It incorporates hierarchical cross-scale attention, dense connections, adaptive background weighting, and dual supervision for enhanced multi-scale feature fusion. The model achieves improved mIoU on LoveDA and ISPRS Vaihingen while maintaining computational efficiency.

Medi-Star Portal

React.js, Tailwind CSS, Node.js, Express.js, MongoDB

Implemented a centralized Medicine Database Module for adding, editing, and tracking drug information. Built an automated Prescription Generator to create structured, printable prescriptions for patients. Designed an intuitive UI and integrated backend APIs to streamline clinical workflow and reduce manual documentation time.

TECHNICAL STRENGTHS

Programming: Java, Python

ML/AI: TensorFlow, NumPy, Pandas, Scikit-learn

Tools: Git, Cursor

- NPTEL Introduction to Machine Learning
